NACG is an independent, non-governmental, not-for-profit Nordic association

We work together and learn from each other to lift our performance standards. We aim at responsible sharing of trustworthy data for improved diagnosis and treatment, and as a resource for research.

# NACG goals

Facilitate the responsible sharing of genomic data, bioinformatics tools, sequencing methods and best practices for interpretation of genomic data.

Enhance quality of genomic data and processes, and explore methodologies to provide assurance.

Understand legal barriers to the implementation of personalized medicine and to engage with key stakeholders that influence these barriers

Develop demonstration projects that challenge perceived legal barriers that limit responsible and ethical sharing of genomic and health data.

Build bridges between research and clinical communities, technologies and practices to foster innovation

## The Nordic Alliance for Clinical Genomics (NACG)

The Nordic Alliance for Clinical Genomics is an association that gathers stakeholders in clinical genomics who collaborate to identify and address emerging challenges to the implementation of clinical genomics and precision medicine.

The Nordic Alliance for Clinical Genomics was named the Nordic Alliance for Sequencing and Precision Medicine (NASPM) until fall 2018.

### How we work

Building on Nordic commonalities, advantages and shared challenges, NACG brings together professionals interested in sharing experiences, data and best practices for the implementation of precision medicine.
